## Experience

### Associate Marketing Cloud Developer

DXC Technology | Australia - NSW | 2021 - Present

- Developed Responsive / Mobile First Design with the implementation of clean HTML and CSS practices.
- Approached all projects and solutions with an Agile development mindset.
- Utilised SQL queries to perform CRUD actions alongside the assisting in database management.
- Executed solutions through the integration of SOAP and REST APIs.
- Utilised Server Side JavaScript and AmpScript to enhance solutions.
- Developed and conducted unit tests alongside assisting clients and external testing teams with user acceptance testing.

## Projects

### Untitled-Suite

Live Demo: <https://untitled-suite-react-app.netlify.app/#/>

React | Ruby On Rails | PostgreSQL | Material-UI | Axios | Heroku | Netlify | Jest | RSPEC | Cypress

- Untitled Suite's original intention is to provide project managers and their teams a one-stop shop for optimising task management.
- Final Group Project for Coder Academy.
- Approached with an agile development mindset.
- React front-end with Ruby on Rails API back-end.

### Workout Jungle

Live Demo: <https://workout-jungle.herokuapp.com/>

Ruby on Rails | PostgreSQL | Bootstrap | Heroku | Cloudinary | Trello | Balsamiq

- Two-sided marketplace in which Australian consumers can buy and sell new and used fitness equipment.
- Approached with an agile development mindset.
- I utilised feature sprints and implemented continuous deployment with the aid of development and production pipelines.
- The database for Workout Jungle's user base and their listings provided an interesting yet challenging experience.
